

CARNEGIE MELLON UNIVERSITY BME 2024 SPRING SEMINAR SERIES

Ethics in Regenerative Medicine

PRESENTED BY

Graham Parker, PhD

Editor-in-Chief

Mary Ann Liebert, Inc.

Translational Research Support Core

Lead

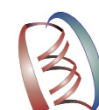

CURES NIEHS P30

SCHEDULE

Doherty Hall (DH) 2315

**Thursday,
February 8, 2024
(11:00-12:00PM)**

The vast majority of people in research want to do good. Problems with misconduct usually arise through negligence. Deliberate neglect typically reflects a misguided sense of self-worth. In this presentation we will remind ourselves what biomedical ethics are. We will understand how research advances can be a product of their environment. Finally, we will explore how ethics can be in conflict with individual efforts to advance discovery.
